**Iowa Flood Mitigation Program (FMP)
Flood Recovery Project Application**

What is the Flood Recovery Fund?

A Flood Recovery Fund is established in the state treasury under the control of the Flood Mitigation Board to provide funding to eligible political subdivisions of the state to implement flood response, flood recovery, or flood mitigation projects.

Eligibility:

- 1) An eligible applicant is a political subdivision of the state located in a county designated under presidential disaster declaration DR-4421-IA and also located in a county where the federal emergency management agency individual assistance program has been activated.

- 2) Eligible projects must support flood response, flood recovery, or flood mitigation. Eligible project types include construction and reconstruction of levees, embankments, impounding reservoirs, conduits or other means that are necessary for the protection from the effects of floodwaters and may include the deepening, widening, alteration, change, diversion, or other improvement of watercourses if necessary for the protection of such property from the effects of flood waters. A project may consist of one or more phases of construction or reconstruction that are contracted for separately if the larger project, of which the project is a part, otherwise meets the requirements of this subrule.

Application Process:

This application is designed to capture the necessary information to meet program requirements.

- 1) Description of the project and how the project supports flood response, flood recovery, or flood mitigation activities.
- 2) Description of financial assistance need through the Flood Recovery Fund.
- 3) Description of the necessary expense or serious need of the political subdivision.
- 4) Details on any additional funds to be applied to the project.

Flood Mitigation Board Process:

- 1) Review the application.
- 2) Approve, defer, or deny the application.

III. Project Plan Summary

A. Provide a brief description of the project and how the project supported flood response or will support future flood recovery and flood mitigation activities. This is a summary of Tab B - Project Plan.

The City of Pacific Junction encountered severe flooding during the Federal declared disaster with an incident period of March 12, 2019 to June 15, 2019. The entire City of Pacific Junction was inundated with flood waters ranging from 2 feet to 8 feet and remaining for greater than 30 days. The flooding was a direct result of elevated waters in the Missouri River, Platte River, and various levee breaches along the Missouri River. From this event approximately 200 properties were affected by the flood waters within Pacific Junction. From these properties, 147 property owners (145 Structures) of substantially damaged homes (<50% damage) have indicated the desire to participate in the Hazard Mitigation Grants Program (HMGP) acquisition project and remaining property owners expressed interest in allowing the demolition of their property as the structures have been designated public health and safety concerns. As a result, Pacific Junction is submitting an HMGP application to voluntarily acquire the 147 identified properties. In conjunction with the HMGP application, Pacific Junction has submitted all required documentation to FEMA Public Assistance to write and obligate a project worksheet to reimburse funds spent to demolish up to 200 properties. By participating within the HMGP acquisition all properties acquired are required to be deed restricted as open space in perpetuity. Which would remove all structures and life from harms way going forward providing 100% mitigation.

B. Provide a brief description of the financial assistance need through the Flood Recovery Fund.

Pacific Junction is requesting assistance with the Local Match (15%) requirement of both the HMGP acquisition grant and the PA demolition project worksheet. To meet the 15% requirement the estimate is at \$3,153,638.25. The remaining 85% of funds needed are anticipated/expected to be covered by approved Federal funds (75%) through HMGP and PA with the remaining funds covered by State Executive Council funds (10%). The initial budget provided account for a pre-flood market value of each structure which currently is being estimated based on 110% of each property's assessed value. This amount will deviate (+/-) due to appraisals being completed on each property as well as when proper procurement and contracting is completed for all services rendered within the applications. Attached you will find the budget breakdown and overall cost estimates for both the HMGP grant and the PA demolition project worksheet. Project management amount for the HMGP grant is based on the allotted 5% of the overall application amount, while the PA project management amount is based on an estimated 3% of the overall project worksheet estimate.

C. Explain how financial assistance through the Flood Recovery Fund is essential to meet the necessary expenses or serious needs of the applicant related to flood response, flood recovery, and flood mitigation.

Pacific Junction has and is currently expending a significant amount of reserve funds to respond and recover from the recent flooding. As a result, have limited to no funds to complete significant mitigation efforts. Based on the lack of funds, Pacific Junction is seeking FRF funds to assist with the mitigation grant local match requirements. Also, the City of Pacific Junction is requesting an upfront immediate amount of the HMGP pre-award of \$112,800 in order to complete the necessary work to submit the HMGP application for approval. As Pacific Junction has limited to no incoming funds, there is currently no funds available within the City's general funds to cover all of the upfront costs.

D. Provide details of any additional funds that can be applied to the project.

Current there have been no Notice of Funds Available released for alternative Federal Programs. In the event that future Federal funds are released to assist with a project of this nature the FRF ask will be revised. However, most Federal Programs require a local match element which the FRF funds can be used to offset.

E. Description of Project Location (i.e. Latitude and Longitude (minimum 6 digits after the decimal), Neighborhood, Subdivision, Geographic Boundaries, Driving Directions, etc.)

All identified properties are located within the jurisdictional boundary of the City of Pacific Junction. Attached you will find mapping which identifies the properties in question.

IV. Work Schedule

A. List the major milestones for this project.

Task	Months/Years from Award		Responsible Party
	Start	Complete	
Receive Federal Grant Awards, Establish Grant Procedures	0	2	Pacific Junction
Present Purchase Offers, Acquire Properties	2	33	Pacific Junction

V. Certifications

To the best of my knowledge and belief, I certify that all data in this application packet is complete, true and correct. The governing body of the applicant has duly authorized this document and hereby applies for assistance as documented in this application. The applicant understands that the project shall not proceed until Flood Mitigation Board approval is granted.
