

Session Title:

Statewide Multidiscipline Safety Team (MDST) Program, a collaborative effort for traffic safety

Speaker(s) & Professional title:

Theresa Litteral, Statewide Multi-Discipline Safety Team Facilitator

Summary:

The Statewide MDST Program operates by coordinating communication and collaborating with other traffic safety stakeholders throughout the region. A large piece of the program involves professional information exchange & coordination with Traffic Incident Management training. The program also serves to develop interagency collaboration, helps resolve local traffic safety issues, identifies & mitigates crash causes, improves crash response & other best practices. Participants gain a broader perspective on safety issues and learn best practices from professionals outside their area of expertise. This ultimately leads to the development of solutions that may not have been considered otherwise.
