<u>Description of significant activities of this semi-annual term. Include comparison of actual accomplishments to the objectives identified in your application. Attach pictures and a narrative. Status changes or delays, please explain reason.</u>

Phase V, moving in to Phase VI

Phase V of the project is complete, with all remaining retainage paid out during the past 6 months. We were able to bid out Phase VI, award bid to S&G Construction, and begin construction in October 2020 on this phase of the flood wall, which will include tieing the flood wall at both the north and south ends from the riverfront west across the shortline railroad, including the installation of rail gate closures. Low river levels, for the first time in a couple years, has helped this phase of the project begin in a timely fashion.

MASL Sewer Separation

Construction on the Locust Basin is approximately 60% complete. Our overall project costs, including engineering, for this phase of the MASL project are now anticipated to be \$8.5 Million. As discussed in previous reports, our current estimates for remaining portion of the MASL Sewer Separation work are currently approximately \$90 Million for construction costs. We have been working with Iowa DNR on a potential revision to our project schedule, which may see some of the MASL work completed on a delayed schedule from what was included in our grant application. FYE Excavating began work in June 2019 on the Locust Basin portion of the MASL project, and is anticipated to be complete with the majority of their work by late fall 2020.

Private Investment

Private investment in the project area has amounted to \$18,671,989 as reported through Downtown Partners, Inc. since project inception. One major current project is the redevelopment of a building at the corner of 5th St and Valley St, which was completed in October 2020. The owners have constructed approximately 35 upper story housing units. For perspective, our downtown area currently has about 200 upper story housing units, so this represents a significant new development in our downtown area.
