

00:24:32.764,00:24:35.764

Brenda Vande Voorde: is there a good way to address phone service providers that do not respond to a TN CR?

00:26:09.063,00:26:12.063

Scott: For those of us who contract with Geo-Comm for GIS maintenance for the 911 system, will Geo-Comm be taking care of this as part of that?

00:31:19.392,00:31:22.392

Brenda Vande Voorde: I end up having to resubmit the request and that takes more time.

00:47:50.611,00:47:53.611

Melissa L: melissa.liebert@comtechtel.cm

00:48:10.791,00:48:13.791

Melissa L: sorry. melissa.liebert@comtechtel.com

00:48:26.253,00:48:29.253

Ray Weiser: The ALI/MSAG data available for download from ComTech is typically in a fixed width format, (and I have received the position column data in order to import). However, is there any chance that the download format can be set to include column width info? It's a minor thing, but I think would improve data transfer.

00:51:33.179,00:51:36.179

Ray Weiser: Is that a relatively recent change?

00:57:37.026,00:57:40.026

Thomas Millikin: Just to clarify, Geocomm will be working to solve those critical errors for those counties with Geocomm GIS contracts?

00:58:22.710,00:58:25.710

Thomas Millikin: Thank you!

00:58:39.646,00:58:42.646

Brenda Vande Voorde: sometimes the error corrections is a little like whack a mole we fix one and create several more errors

00:59:27.238,00:59:30.238

Brenda Vande Voorde: thank you
